# Future trend

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, Lorem ipsum dolor sit

1 Medical AI

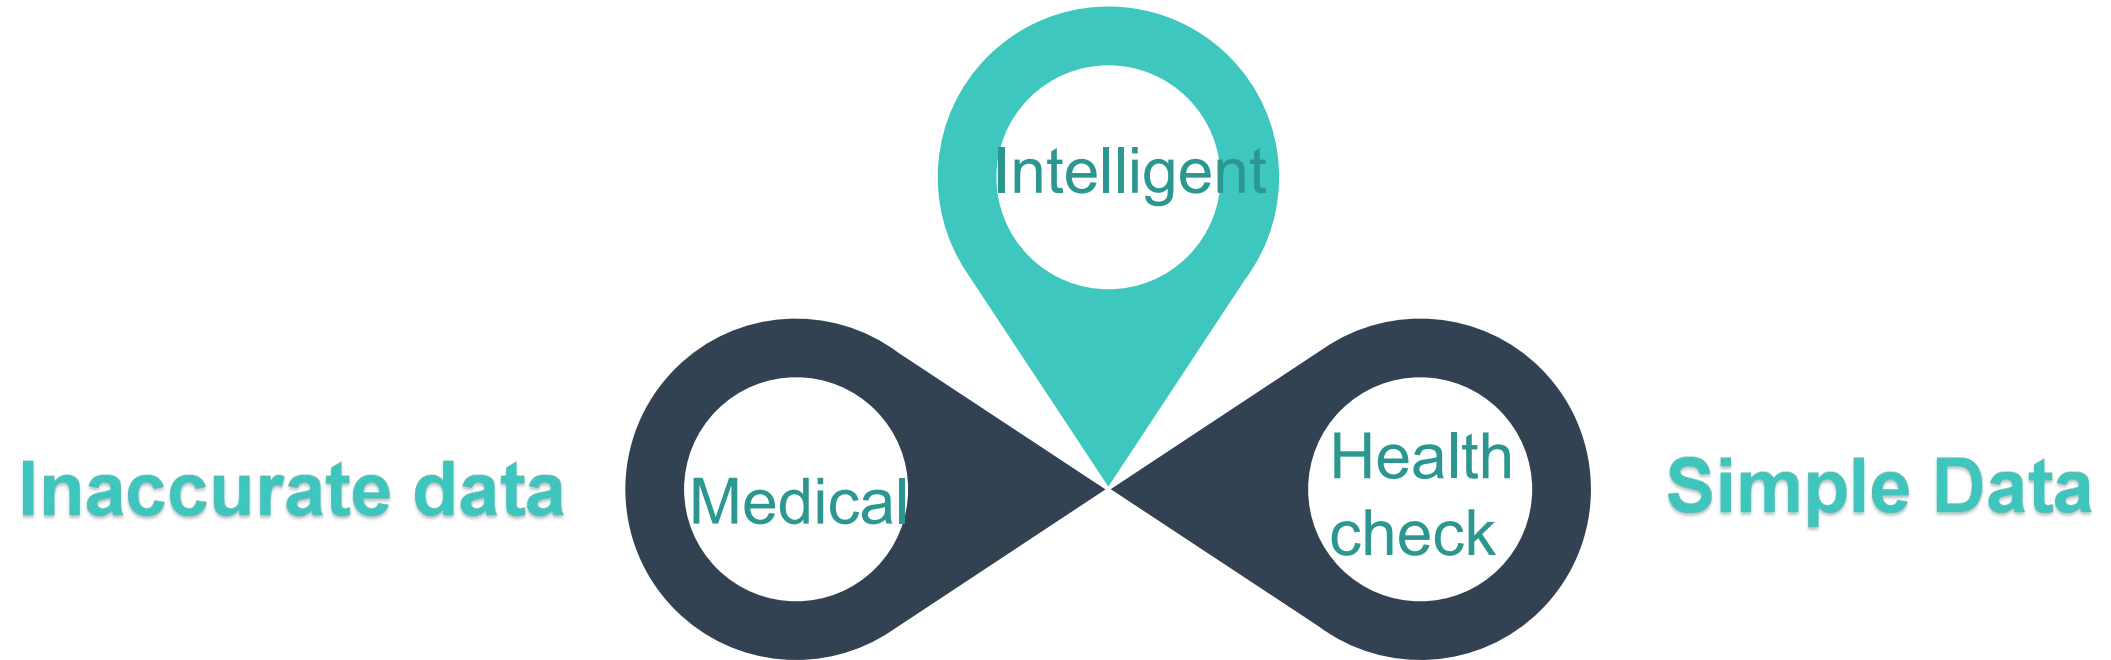

2 Personal health data

3 Wearable detector

4 Block chain safety

**Data error**

**Correct data: complete, accurate, effective**

# Data value

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, Lorem ipsum dolor sit

	Item	Frequency	Requirement		Points added	Highest points
1	Continuous measurement	Once every 5 seconds	80% or above	20%	When data is above 80%, 10 points added for each 5% addition. The highest is 30 points	90
2	Dynamic data	Once per hour	80% or above	40%	When data is above 80%, 10 points added for each 5% addition. The highest is 60 points	180
3	Static data	Once per Month	80% or above	10%	When data is above 80%, 1 point added for each addition. The highest is 15 points	45
4	Comprehensive examination	Once per year	10 items or above	10%	1 point added for each item. The highest is 15 points	45
5	Self illness check			10%	1 point added for relevant data collected each time. The highest is 30 points	30
6	Gene test			10%	0.3 points added for each item. The highest is 60 points	60

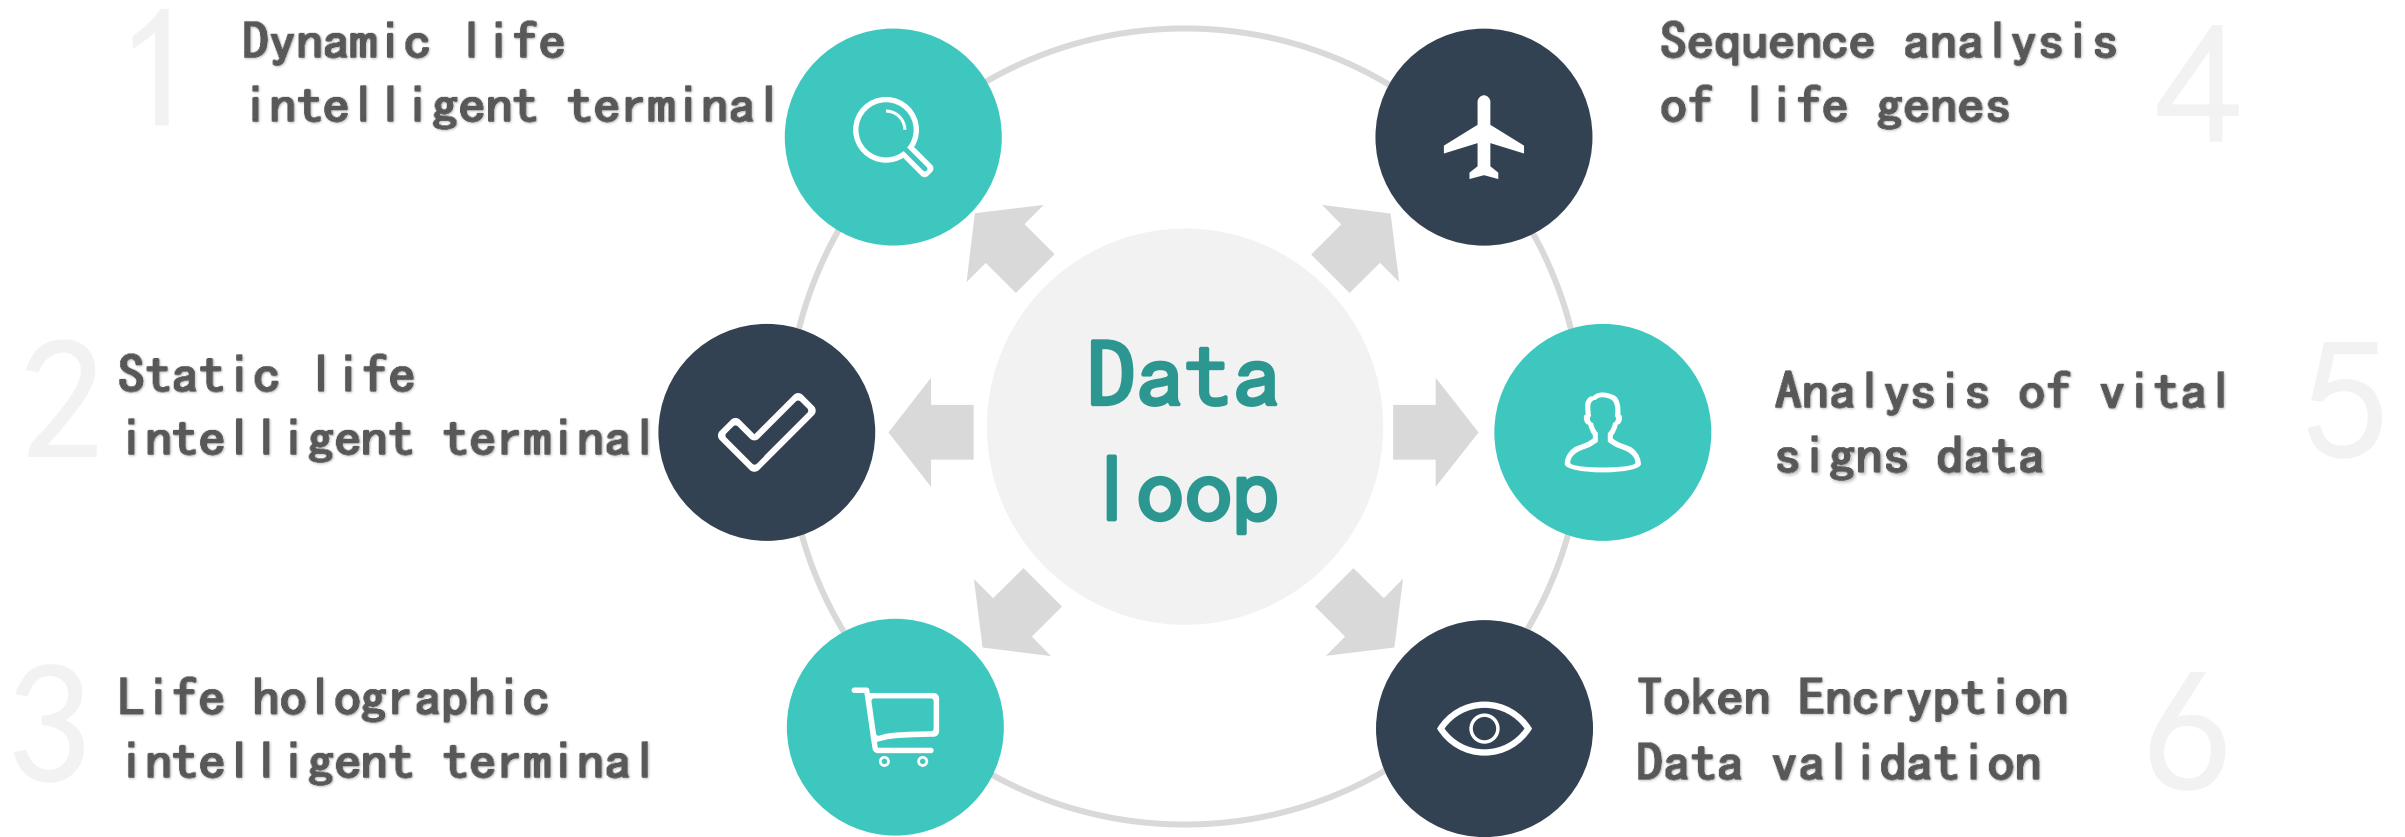

Not all the data is valuable. Various types of data are needed to reflect real health situations in order to support AI medical treatment. The integrated data, including amount of data, completeness of data, time span, real time effectiveness, data depth, coverage, scarcity, etc. is of real commercial value. No single entity has ever collected all the data mentioned above. Jian Yi is going to accomplish this challenging yet great project.
